WASHING AND CARE ADVICE FOR SHEEPSKIN AND WOOL SLIPPERS

You should avoid washing this product for as long as possible. If the slippers have to be washed, we recommend that they are hand-washed or that they are washed in the washing machine at 30 degrees on the wool program. Only use a mild liquid detergent and preferably a detergent especially made for wool. Drying the slippers should be done as naturally as possible, for example by letting them dry in a normal room temperature. The best way for the slippers to hold their shape after washing is to place some paper inside them. Using a soft suede brush on the product when they have dried, will return the product to its original quality. Avoid drying in direct sunlight or near to a radiator. Please note that slippers with transfer prints are not washable.

SCANDINAVIAN

Swedish design tradition emphasises care for every little detail. We work with materials we love-natural, timeless and authentic. That's who we are.

HANDMADE WITH PASSION

We have always had a passion for craft skills. The combination of pure Swedish design and handcraft experience results in timeless, beautiful products. One single slipper is made of multiple separate pieces. Always made from real sheepskin that has been treated in over several different stages to get the right quality and finish. Then all pieces are assembled by our skilled craftsmen, mostly by hand.

GENUINE

We choose to work with sheepskin and wool because of their unique qualities. For us, their feeling and comfort is superior all other materials. Sheepskin keeps you warm when it's cold and feels cool when it's hot. Wool also has a natural antibacterial property.
